SUMMARY

Computer Science graduate with hands-on experience in the MERN stack and RESTful API design. Built independent projects spanning real-time communication (WebRTC), analytics dashboards, and conversational web applications, with the ability to speak in depth about the technical decisions behind each build.

SKILLS

Languages: JavaScript (ES6+), Python, C++, Java, SQL

Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, MySQL

Real-Time / AI: WebRTC, Socket.io, OpenAI API integration

Tools: Git, GitHub, VS Code

EXPERIENCE

MERN Stack Development Trainee **Jan 2026 – Jun 2026**

Jspiders (Qspiders) *Noida, India*

- Completed an intensive MERN stack training program covering React.js, Node.js, Express.js, and MongoDB through structured coursework and hands-on practice modules
- Built multiple practice applications implementing REST APIs, CRUD operations, JWT-based authentication, and responsive UI components
- Practiced Git/GitHub-based version control workflows and basic deployment as part of the training curriculum

Web Developer Intern **Jul 2024 – Aug 2024**

NullClass *Delhi, India (Remote)*

- Built a real-time video conferencing platform using React.js, Node.js, and WebRTC, supporting live chat, screen sharing, and session recording
- Implemented secure peer-to-peer connections using WebRTC with Socket.io-based signaling, improving cross-device call stability and reliability
- Designed a responsive login and authentication interface with modern UI components for a smooth onboarding experience

PROJECTS

NovaMeet | *React.js, Node.js, Express.js, Socket.io, WebRTC (Simple-Peer)* | GitHub

- Developed a real-time video conferencing web app that lets users create and join meetings via unique meeting codes, with live video/audio, chat, screen sharing, and recording
- Implemented WebRTC peer connections with Socket.io-based signaling to manage session negotiation, improving connection reliability across devices and networks
- Built a responsive, modern UI in React to ensure a consistent experience across desktop and mobile

FinsightAI | *React.js, Tailwind CSS, Recharts, Node.js, Express.js, MongoDB, Python (Scikit-learn)* | GitHub

- Built the frontend and UI for an AI-powered investment platform, including a portfolio analytics dashboard, a virtual trading simulator, and a risk-profiling quiz, using React and Recharts for data visualization
- Integrated the frontend with backend REST APIs (Node.js/Express, JWT auth) and a teammate-built ML prediction model; independently owned end-to-end UI/UX and dashboard architecture while a peer built and trained the model in Python/Scikit-learn

SigmaGPT | *MERN Stack, OpenAI API* | GitHub

- Built a ChatGPT-style conversational web application where user input is processed and a relevant response is generated in real time, using a MERN architecture integrated with the OpenAI API
- Implemented the chat interface, request handling, and API integration independently; currently refining the project ahead of publishing it as a standalone repository

CERTIFICATIONS

Full Stack Web Development — Apna College • Cloud Computing — NS2EDU • AI Training — Bolt IoT • Web Development — Internshala

EDUCATION

Bachelor of Technology in Computer Science Engineering **Aug 2022 – Jun 2026**

Gateway Institute of Engineering & Technology (DCRUST), Haryana, India
